Vue.js, JavaScript
web development & design

Docker services
container technologies

Amazon Web Services

Never the greatest student at school, but I love creating/learning through projects that interest me. Over the years I have taught myself multiple new things. I have spent a lot of time developing software & building electronic circuits. To fund my studies and projects, I work full-time next to my education. I've been catering and working in tech-related businesses since 2010. These different jobs have given me experience in multiple different sectors.

EDUCATION

2020 - 2021

Master's thesis in Electronic & Software engineering,
